

MADE IN THE USA SINCE 1940

# SUPERthrive®

The original vitamin solution  
enhanced with kelp

Secure your transplants, revive stressed plants and produce abundant yields with SUPERthrive. Our unique, non-toxic vitamin solution encourages rapid root development throughout keystages of your plant lifecycle ensuring maximum nutrient uptake, stimulating growth from the inside out. This versatile and cost-effective solution can be added to your existing media and nutrient schedule, join generations of growers today and allow any, and all, of your plants to truly thrive.

Useful for many applications including with bonsai trees, cut flowers, field crops, orchards, hydroponics, landscaping, propagation, water gardens, weather damaged plants, transplanting.

**Transplanting hint: Place root ball in hole filled with Superthrive water. When bubbles cease, add soil & SUPERthrive water on top.**

Dr. John A. A. Thomson – Inventor of SUPERthrive®  
November 23, 1911 – November 28, 2011
